

Cheetah saved me \$11,450.00 in labor on just one project!

Tim Branham started Branham Electric, Inc. in 1991. Headquartered in St. Louis, Missouri; the company's emphasis has always been super-custom homes and multi-family/mixed-use construction. Over the past few years Branham Electric has been the electrical contractor of choice for most of the areas' large multi-family/mixed-use projects and many of St. Louis' outstanding luxury homes. Tim knows construction and stresses that labor will either make or break any residential project!

"We recently tried Cheetah and could not believe the results. Our electricians are trained for speed, still we were more than pleasantly surprised when the Cheetah numbers came in."

Tim Branham - Owner
