

Cheetah saved me 480 hours in labor on just one project!

“Do the math! That is over 60 days labor savings on this project. I am saving over 2 hours per home. It adds up, I estimate we will save over \$15,000 in labor savings on this project alone. The labor savings are huge!”

Grant Henderson owns and runs Sidewinder Electric. He knows labor is everything. He is currently using Cheetah on a 240 home project in Safford, Arizona.

“The labor savings are proof. My crew completed their first 2,500 square foot house in Cheetah 45 minutes. The same crew takes 2 ½ hours on an identical house with regular screws. I’m using Cheetah right now on 240 homes. It really is a no-brainer”

Grant Henderson - Sidewinder Electric
